

New VITA VIONIC RESINS for Your Digital Workflow

Esthetic Printing in VITA Quality

From mid-May 2025, VITA Zahnfabrik will be expanding its range of products for digital prosthetics with the innovative 3D printing materials from the VITA VIONIC SOLUTIONS portfolio. The new VITA VIONIC RESINS offer users high-quality materials and reliable shades, making 3D printing in the laboratory cost-efficient and dependable.

For final denture bases, the VITA VIONIC BASE RESIN IMPACT is ideal due to its durability and impact resistance, available in pink and pink translucent. VITA VIONIC DENT RESIN provides abrasion-resistant, shade-stable dental arches and elements in eight VITA classical A1-D4 shades and the bleach shade 0M3, suitable for final dentures as well as temporary crowns and bridges. With VITA VIONIC TRY-IN RESIN the new range of printing materials is complete.
