

Candulor Press Release Regarding the Swiss School of Prosthetics | Glattpark, April 2, 2026

SSOP Power Week 2026: Five days of intensive, specialized continuing education in the field of full-mouth prosthetics according to GERBER

With the **Power Week 4-in-1 - Dental Expert Training**, the Swiss School of Prosthetics (SSOP) is once again offering an intensive continuing education program for dental technicians, prosthodontists, and dentists in 2026. From **September 21 to 25, 2026**, the five-day training course in Zurich will provide practice-relevant expertise in modern complete dentures.

Power Week combines the content of several coordinated courses into a holistic learning concept. The analog workflow for fabricating a complete denture is examined and implemented, from model analysis with functional and aesthetic planning through to the completion of the denture. With the fundamentals acquired, both analog and digital processes can be implemented and evaluated.

Content and Learning Objectives of Power Week 2026

During Power Week, participants will acquire the following competencies, among others:

- Independent model analysis, planning, and fabrication of a complete denture
- Application of **lingualized occlusion according to the GERBER concept**
- Functional and aesthetic design of prostheses
- Individual and natural-looking **gingival characterization**

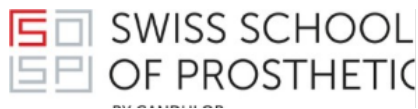

The practice-oriented approach enables participants to apply what they have learned directly in the laboratory and to firmly integrate it into their daily professional practice, ensuring a reliable replication of the analog workflow from analysis to the finished prosthesis

In addition to the intensive training program, Power Week offers participants the opportunity to experience Switzerland.

About CANDULOR

CANDULOR. HIGH END ONLY.

CANDULOR is synonymous with high-end prosthetics in the field of partial, full, and implant-supported restorations. Founded in 1936 and headquartered in Switzerland, the dental company offers a comprehensive prosthetic system for dental technicians and prosthodontists. CANDULOR products are used in high-quality prosthetics that combine aesthetics, design, and functionality and meet the most demanding standards for quality and individuality. With the SSOP's unique training concept, CANDULOR makes a significant contribution to the preservation, transfer, and further development of prosthetic expertise and practical know-how in the dental industry. The ISO 21001:2018-certified educational institution, with its globally based team of teachers from both academia and practice, offers a training concept for the dental and dental technology sectors that meets current requirements for sustainable knowledge transfer. The continuing education programs range from theoretical courses to practical hands-on courses and complete modules. Another offering is the SSOP consulting program, which enables customized training and best-practice consulting for dental practices or dental laboratories on-site. You can find more information about SSOP at www.ssop.swiss
