

## “PROSTHETIC KNOWLEDGE FOR HIGH PATIENT SATISFACTION”

Certified prosthetics training courses in the Netherlands now available at ATT

*The SSOP Swiss School of Prosthetics is delighted to welcome ATT Advies & Training as its new training partner for the Netherlands, with Toine Klaassen as head of ATT and future member of the SSOP teacher team. His strength lies in combining a high level of dental precision with extensive clinical experience.*

Through the new partnership with ATT, the SSOP is further expanding its presence in the Netherlands and has gained a teacher in Toine Klaassen who brings with him more than 35 years of passion for dental technology and over 25 years of clinical experience as a dentist. As a new pillar of SSOP, ATT will offer practical hands-on courses. These courses will allow experts to further their education and technicians to refresh their basic knowledge.

### **Taking young people and experts to a higher level**

The technical focus of the new SSOP teacher Toine Klaassen is on total, partial, and implant prosthetics for fixed and removable restorations. He places particular emphasis on individual tooth alignment, precise workmanship, and a finish that is both functional and aesthetically pleasing.

Passing on knowledge is a matter close to Toine Klaassen's heart. After many years in management positions, both in small teams and in larger dental chains, he now sees the right time to pass on his extensive know-how to young colleagues as well as experienced dental technicians. He has already laid the foundation for this with his training facility ATT. He is now taking the next step by adding certified SSOP courses to his program.

He advocates a holistic view of prosthetics. In his courses, he not only teaches the technical aspects of modern prosthesis manufacturing, but also shows how crucial analysis, expertise, and technical quality are in influencing the clinical process and ultimately the well-being of patients—in line with the holistic learning approach of the SSOP training concept. He does not view analog and digital techniques as opposites, but as complementary levels for high-quality, individual solutions. Toine Klaassen comments: "I already have a strong affinity for digital technologies. I love trying out new things and then successfully incorporating them into laboratory processes."

### **Practical relevance as the basis for successful teaching**

Despite his focus on training since 2022 with his own training institute, ATT Advies & Training, Toine Klaassen remains closely connected to practical work. He explains: "Every day brings a new challenge. That's why it's extremely important for me to continue my own training and to continue treating patients in my own clinic. What's more, my wife and son are part of the team. I am delighted that continuity is being maintained here and that all of us in the family share a great enthusiasm for this profession."

"In dental technology and dentistry, learning never stops," Toine Klaassen is convinced. He shares this very aspiration with the SSOP: sound knowledge, practical teaching, and a passion for prosthetics that is technically, aesthetically, and functionally convincing.

### **An overview of the upcoming courses:**

Course	Date	Location
Setup according to the physiological concept <a href="#">Opstelling volgens het fysiologische concept - Swiss School of Prosthetics</a>	22.09.2026	Bergen op Zoom, NL
